Creating Reading Lists Using Curriculum Builder in Blackboard

1. Access Curriculum Builder under Course Content, Tools and Curriculum Builder from the drop down menu.
2. Name the reading list, select the appropriate options for your class and click Submit.

3. You can search for full-text articles by Keyword, Author or Title.
4. On the search results page, you can easily add items to your reading list.

5. The full-text of the article is now available for students to read. Faculty can also see which students have viewed that article.
6. You can create folders to organize material by topic, add text and instructions and add web links.
